The reasons for the cancellation, delay or rejection shall be made a part of the project file and shall be available for public inspection.

In no case will the award be made until all necessary investigations have been made into the responsibility of the OFFEROR, and the OWNER is satisfied that the OFFEROR is qualified to do the work and has the necessary equipment to carry out the provisions of the Contract to the satisfaction of OWNER within the time specified. OWNER may award separate contracts for each project scope or for any combination of projects.

Execution of Contract: The individual, firm or corporation to which this Contract has been awarded shall sign the necessary agreement entering into Contract with OWNER, and return it to OWNER within ten (10) days after date of award.

4 SOLICITATION AND TECHNICAL REQUIREMENTS

Guam Power Authority Regulatory Consulting Services

4.1 Minimum Requirements

1. Experience with Customer Agreements between a utility and a significant customer.
2. 10 years of experience working with utility cost of service issues.
3. 10 years of experience working with utility rate petitions
4. 10 years of experience working with utility non-rate petitions.
5. 10 years of experience working with fuel hedging programs.

4.2 Scope of Work for Procurement Advisory and Consultation Engagement

This scope outlines Guam Power Authority's proposed regulatory consultation requirements.

General Regulatory Services

GPA desires to enter into a contract with a regulatory professional to assist the Authority with regulatory matters including rate petitions before the Guam Public Utilities Commission (PUC). Other related tasks include the development of cost-of-service studies, advisory services related to rate petitions, and assistance with the development of petitions for other regulatory matters before the Public Utilities Commission – matters either currently before the commission, matters planned to be brought before the commission, or matters that will arise in the future.

GPA also desires the consultant to provide assistance to GPA on matters related to the development of not only the transmission level cost of service necessary to allocate costs between the civilian and DOD customers, but also to prepare and submit testimony to the Public Utilities Commission in defense of a distribution level cost of service study as well as transitional movements toward the elimination of interclass subsidies as well as intra-class subsidies.

The construction of 198MW combined cycle Ukudu Power Plant is underway. The Consultant will be requested to assist the Authority in the completion of a rate plan and to work through the rate impact of the new generation, prepare a testimony and file such rate impact study with the PUC. Assistance required will likely include the need for a regulatory attorney which should be included as a member of the Consultant's team.

From time to time, GPA has a need to file rate related petitions with the PUC. GPA desires the consultant to assist in the preparation of such petitions. Among the types of petitions that might be required are petitions to establish an appropriate Time of Use rates and appropriate new rate design for Net Metering customers.

The Consolidated Commission on Utilities may also have requirements for consulting projects and studies in advance of a regulatory filing. This type of study would also be included as part of the scope of this contract.

Revenue Forecasting

GPA requires a forecast of demand periodically for purposes of developing, one year, five-year and 20-year revenue forecasts. The one-year forecast would be utilized for annual budget planning. A five-year forecast would be used in conjunction with a rate petition before the Public Utilities Commission. A 20-year forecast would be utilized in conjunction with an update of GPA's Integrated Resource Planning process or for other studies.

Fuel Hedging

The Public Utilities Commission in the past approved GPA fuel hedging program. The Authority like to continue monitoring the market and place hedges as needed to minimize the risk of fuel volatility. The Authority may also look into the development of Risk Oversight Committee and possible outsourcing some of the Risk Management functions

Military Buildup

The Guam Power Authority has modeled estimates of the infrastructure requirements needed under a variety of scenarios. Recent information has isolated one of the scenarios as the most likely option for the infrastructure

needs associated with the impending military buildup. GPA will provide these cost/impact estimates to the consultant. GPA requires assistance in the assignment of these costs in an appropriate manner consistent

with generally accepted ratemaking principles. This aspect of the scope is related solely to the military buildup. Should the delay in the military buildup extend beyond the term of this contract, these services would not be required.

Other Regulatory Services as Required

The Authority also needs assistance in other areas such as:

- 1. Long Range Financial Planning
- 2. LEAC (Fuel Cost Adjustments) models and methods
- 3. Fuel Cost Forecasting
- 4. Standby Rates for Customer Owned Generation
- 5. Financial Feasibility Studies
- 6. Financial Policies
- 7. Line Extension Policies
- 8. Training for CCU Board Members and Staff

GPA reserves the right to break this scope into smaller pieces and award the contract to multiple vendors.

4.3 CONTENTS OF THE PROPOSAL

At a minimum, the proposal shall contain:

- A. The name of the offeror, the location of the offeror’s principal place of business, and, if different, the place of performance of the proposed contract, and,
- B. The age of the offeror’s business and the average number of employees over the past year; and,
- C. Time of delivery of the project illustrating all major tasks and their duration; and,
- D. The abilities, qualifications, and experience of key persons who would be assigned to perform the required services; and,
- E. A listing of other contracts under which services similar in scope, size, and discipline for the required services were performed or undertaken in the past ten years; and
- F. A plan giving as much detail as is practical explaining how the services will be provided; and,
- G. References or letter(s) of recommendation from prior companies serviced; and
- H. Competency of offeror; and
- I. Copy of business license, Articles of Incorporation, and certificate of Incorporation or Partnership, or Sole Proprietorship.
- J. Any exceptions the contractor is taking to the terms and conditions in the RFP.

4.4 RFP EVALUATION CRITERIA

Experience of the firm in this type of engagement in a utility environment	25
Key personnel assigned to project	20
