INVITATION FOR BID GSWA-012-24 SLOW SPEED WASTE SHREDDER

Questions and Concerns received from Far East Equipment Co. on July 29, 2024

1. Please clarify the Rotor Torque 160,000 ft-pound minimum, 180,000 ft-pound maximum. In order to have consistent product sizing and quality that GSWA is asking for tires which are the most difficult product GSWA is trying to shred you will require at least 300,000 Ft-Pounds of torque. Any machines with less than this amount of torque will not be able to produce the consistent product and quality for tires. Please advise if GSWA will upgrade the torque requirements for the shredder.

Response: GSWA is removing the torque requirement (160,000ft-pound minimum, 180,000 ft-pound maximum) to allow a broader range of equipment that can meet our operational needs. Refer to Amendment No. 6.

Irvin L. Slike,
General Manager
