November 27, 2024

AMENDMENT NO.: IV

TO

REQUEST FOR PROPOSAL NO.: GPA-RFP-24-015

FOR

MV90 SOFTWARE AND SYSTEM SERVICES

Interested Firms/Individuals are hereby notified of the following response to an inquiry received from Offeror No.: 6 dated November 15, 2024:

QUESTIONS:

1. In the amendment III and in reply to question 7. "Integration into MDM and other GPA systems", Integration with MDM Systems and iDashboards applications have been requested. Will Guam use the standard MV-90 export files to import data into their systems, or do we need to create a customized interface/file format for integrating MV-90 data into those applications? In case of the latter and to work out the level of effort and required professional services, we would need the following further information:
 - a. Data type and input format of those applications
 - b. Any special configuration or interfacing requirements

ANSWER:

- a. We will use the standard export from MV90.
- b. Not at this time.

QUESTIONS:

2. About question 8 of the amendment: "In case of requiring any new hardware modules, would GPA supply that based on proponent 6 recommendations?" it should be noted that we will provide the solution and recommend the required hardware upgrade to accommodate the new solution but will not quote or supply the hardware part and it's assumed Guam Power Responsibility to upgrade their hardware infrastructure, based on the new architecture.

ANSWER:

That is okay.

All other Terms and Conditions in the RFP package shall remain unchanged and in full force.
