IV	<p><b>Treasurer's Report</b></p> <p>No report</p>	Dr. Supit	1511	No report
V	<p><b>HPLO Administrator Report</b></p> <p>An update was provided regarding the dental exam scheduled for August 2025, indicating that it would likely need to be postponed to the new fiscal year. The reason for the delay is the significant expense of the exam in February, which cost over \$20,000 and depleted the available funding. As a result, the earliest possible date for the next exam would be October. It was also noted that according to the law, exams are typically scheduled for</p>	HPLO	1512	Noted

Item	Discussion	Responsible Party	Reporting Time Frame	Status
	February and August, which raises concerns about procurement requirements. If the combined cost exceeds \$25,000, a formal bid process would be required to comply with procurement regulations. The board was reminded of these guidelines, and it was suggested that the number of applicants for the August exam could be limited to manage costs.			
VI	<p><b>A. Initial Application for Review and Approval</b></p> <p>1. <b>Yang H. Kim – Dentist</b> <i>Motion to Table Awaiting Feedback from OAG: Dr. Yang; 2nd: Dr. Ha.</i></p> <p>2. <b>Junghyun Kim – Dentist</b> <i>Motion to Table Awaiting Feedback from OAG: Dr. Yang; 2nd: Dr. Ha.</i></p>	GBED	1539	Unanimously Tabled
VII	<p><b>A. Initial Application for Review and Approval</b></p> <p>1. <b>Sarah Byrne - Dental Assistant</b> <i>Motion to Approve: Dr. Supit; 2nd: Dr. Yang.</i></p> <p>2. <b>Ashley Roseann Cruz - Dental Assistant</b> <i>Motion to Approve: Dr. Supit; 2nd: Dr. Yang.</i></p> <p>3. <b>Jo-lee Marie Cruz - Dental Assistant</b> <i>Motion to Approve: Dr. Supit; 2nd: Dr. Yang.</i></p> <p><b>B. Personal Interview</b> The personal interviews began with Dr. Kim, Dr. Aldaca, and Dr. Del Castillo in attendance. The process was outlined by Dr. Rapadas, with an emphasis on getting to know the candidates and preparing them for the upcoming exam. Candidates were instructed to visit Dr. Ha's Clinic to familiarize themselves with the space and the necessary equipment for the exam, including bringing their own mask, gloves, and handpieces. It was noted that two candidates had not yet taken the jurisprudence exam, which is required prior to the clinical exam. Candidates were informed that the jurisprudence exam is a multiple-choice test based on the dental practice act and regulations, which can be found online. Once they pass this exam, they can proceed with the clinical exam.</p>	GBED	1514	Unanimously Approved Unanimously Approved Unanimously Approved Personal Interview was Completed, All Candidates Were Updated on the Procedures of the Dental Examinations Scheduled for February 18th and 19th at 8:00 a.m.

Item	Discussion	Responsible Party	Reporting Time Frame	Status
	<p>The clinical exam process was detailed, starting with the presentation of a crown prep case. Candidates were instructed to select a tooth for the crown prep, ensuring proper occlusal and contact points. The steps included performing a wax-up, taking impressions, and demonstrating the casting process. Afterward, candidates would return the following day with a gold crown to show for cementation. The process was explained thoroughly to ensure all candidates understood the requirements.</p> <p>The candidates were informed about the oral diagnosis case, which will involve multiple factors and require the creation of a diagnosis and treatment plan based on models and x-rays. They were advised to carefully review the patient's health history and propose several treatment plans, outlining step-by-step approaches for the patient's care.</p> <p>For the second day of the exam, candidates were instructed to ensure that their patients were healthy and free of any medical emergencies. It was recommended to choose simple cases, such as a M.O. or D.O. filling, to make the grading process easier. Candidates were reminded to focus on ideal conditions, avoiding overly complicated cases.</p> <p>The operative cases were explained, with candidates first demonstrating the ideal preparation form. If decay was present, they should identify and remove it, then proceed with filling. Both amalgam and composite fillings were to be assessed for correct occlusion and contact points. A similar process was outlined for composite fillings, where candidates were encouraged to select simpler teeth for the procedure.</p> <p>Candidates were also advised to bring a live oral diagnosis case, presenting a patient for examination, including full-mouth x-rays, and to demonstrate their diagnostic and treatment planning process. The candidates were encouraged to show their sequence of actions, check for decay, and outline potential treatments, including referrals if necessary.</p>			

Item	Discussion	Responsible Party	Reporting Time Frame	Status
	<p>The second day would conclude at 3:00 p.m., at which point the board would meet to discuss the candidates' performances. If candidates wished to learn their results, they could attend the board meeting for immediate feedback.</p> <p>Dr. Rapadas gave an opportunity to ask any questions they had at that moment. One of the candidates asked for clarification regarding the oral diagnosis patient, specifically whether they were expected to conduct the treatment planning and screening in front of the board with the live patient present. The candidate also inquired about the need to bring in prepped casts and whether probing should be completed beforehand. The response confirmed that both the casts and probing would be required prior to the examination.</p> <p>Dr. Rapadas continued discussing with candidates their preparation for the exam and patient selection. It was emphasized that the oral diagnosis case should be multifaceted, involving complex issues like occlusion problems or rampant decay, rather than simple cases. Candidates were encouraged to bring challenging cases that demonstrate a range of dental issues and were reminded to include periodontal workup and probing. There were also discussions regarding patient access, with candidates sharing their current work settings. Additionally, it was confirmed that once candidates pass, they would be able to begin working as dentists immediately.</p> <p>Dr. Yang stressed the importance of rubber dam placement during the exam. He emphasized the need for full isolation, not just a partial rubber dam placement. The rubber dam should be properly placed to ensure good visibility, ease of work, and patient safety. Candidates were reminded that the patient's medical history should be checked to avoid any issues, as there have been past instances where patients experienced difficulty with the rubber dam. It was stressed that proper rubber dam placement is crucial for both preparation and presentation.</p>			

Item	Discussion	Responsible Party	Reporting Time Frame	Status
	<p>Dr. Supit mentioned that candidates will be tested on their probing skills. They will be asked to probe specific areas of the mouth during the case presentation, and the probing should match the charting. This would be part of the evaluation process, so candidates should be aware of the accuracy required when recording and charting probing measurements.</p> <p>Dr. Rapadas wrapped up with a few final details reiterating that candidates should demonstrate their knowledge of probing techniques and show how their recorded measurements align with the actual probing during the exam. While not every candidate may be asked to perform a full perio exam, they will likely be asked to probe specific areas and explain their steps during the process. The board will also be evaluating how candidates interact with the patients, checking for a good chairside manner and professionalism throughout the exam.</p> <p>The candidates were reminded to visit Dr. Ha's clinic to familiarize themselves with the setup before the exam, especially if they plan to bring any assistants or patients. Waivers will be required for all individuals involved in the clinical portion of the exam. It was mentioned that candidates must pass the jurisprudence exam before proceeding with the clinical portion. If they don't pass on the first attempt, a second attempt is allowed. The final advice was to stick to the basics. The exam will focus on foundational dental procedures, so there's no need to overthink it. With preparation, it should be manageable.</p> <p>The exam will be held on <b>February 18th and 19th</b>. Candidates should aim to arrive by <b>8:00 AM</b> to set up and get started.</p> <ol style="list-style-type: none"> <li>1. Jay Kim</li> <li>2. Krystal Mae Aldaca</li> <li>3. Nikki J. Del Castillo</li> </ol>

**APPLY NOW!!**

**1 - CARDIAC SONOGRAPHER WITH 2 YEARS EXPERIENCE**

**\$42.80 PER HOUR**

Minimum Requirements: Associate's degree in Radiologic Technology (may be foreign educational equivalent), two (2) years of experience as a cardiac sonographer, and nine (9) months of experience in using PC Windows OS and RIS/PACS system.

**Duties:** Performs Adult and Pediatric echocardiograms, stress echo, transesophageal echo procedures, and other cardiac ultrasound examinations with minimal to little supervision. Reviews patient's medical records to obtain clinical information and communicates with patients to ascertain history and communicate exam details. Operates echocardiogram and ultrasound equipment by following the correct procedures for set-up and maintenance of equipment. Selects and positions appropriate equipment to perform tests and obtain clear images. Reviews images and highlights areas of concern and abnormalities. Ensures that images produced are satisfactory for diagnostic purposes and makes adjustments to equipment as required. Determines whether scope of exam should be extended, based on findings. Provides summary of technical findings to physician for use in medical diagnosis using medical terminology. Inputs data into RIS/PACS system. Performs other duties, as required.

**1 - MRI TECHNOLOGIST WITH 2 YEARS EXPERIENCE**

**\$41.64 PER HOUR**

Minimum Requirements: Associate's degree in Radiologic Technology (may be foreign educational equivalent) and two years of experience as a MRI technologist.

**Duties:** Performs various basic and advanced MRI and MRA examinations independently and well with minimal or direct supervision, not requiring constant supervision of technical detail. Administers intravenously contrast materials for diagnostic purposes. Performs a variety of technical procedures that require independent judgment, competent skills and expertise. Knowledge of cross sectional body anatomies and pathologic processes. Performs the transmission of exams to PACS system and properly attaches to correct procedures, clerical transport functions. Performs basic patient care and communication skills to deal with patients of all age groups. Assumes responsibility to adhere to the company's compliance plan, to the roles and regulations of all local, state and Federal agencies and to the standards of all accrediting bodies. Provides specific guidance and instruction to staff in imaging procedures as required.

**1 - NUCLEAR MEDICINE TECHNOLOGIST WITH 2 YEARS EXPERIENCE**

**\$45.71 PER HOUR**

Minimum Requirements: Associates degree in Nuclear Medicine Technology (may be foreign educational equivalent); two years of experience as a nuclear medicine technologist. Nuclear Medicine Certification Board (NMTCB) or American Registry of Radiologic Technologist (ARRT).

**Duties:** Works under the direction of a Radiologist and is responsible to provide clinically accurate nuclear studies as part of the patient care environment. Performs routine clinical diagnostic and therapeutic nuclear medicine studies and computer applications associated with these studies. Administers oral and intravenous radioisotopes and operates specialized imaging equipment to trace and measure radioactivity. Ability to perform nuclear medicine studies on patients of all age groups.

**2 - ULTRASOUND TECHNICIAN WITH 2 YEARS EXPERIENCE**

**\$42.80 PER HOUR**

Minimum Requirements: Associates degree in Radiologic Technology or Diagnostic Medical Sonography (may be foreign equivalent). Two years experience as an ultrasound technician.

**Duties:** Operates ultrasound equipment to produce and record images of the motion, shape and composition of blood, organs, tissues and bodily masses. Obtains and records accurate patient history, including prior test results and information from physical examinations. Prepares patient for ultrasound examinations; decides which images to include, looking for differences between healthy and pathological areas; and selects appropriate equipment settings and adjust patient positions to obtain the best sites and angles. Observes screen during scan to ensure that image produced is satisfactory for diagnostic purposes, making adjustments to equipment as required. Determines whether scope of exam should be extended, based on findings. Provides sonogram and oral or written summary of technical findings to physician for use in medical diagnosis. Maintains records that include patient information, sonographs and interpretations, publications and regulations, and quality assurance records such as pathology, biopsy, or post-operative reports. Utilizes Radiology Information System and Picture Archiving Communication System to store, send and retrieve images for review. Provides assistance to physicians during invasive procedures.

**Benefits:** Round-trip airfare for off-island hires, free lodging and transportation to/from jobsite for the first 30 days only; employer provided health insurance; option for 401K participation; and 10 paid vacation/sick days per year.

Employees are required to take and pass a substance abuse test.

*The job offer meets all EEO requirements, and initiates a temporary placement. The recruitment associated with this job offer is closely monitored by the Department of Labor. Qualified, available and willing U.S. workers are highly encouraged to apply. Should you qualify for the job and are not hired, you may appeal with the Department of Labor who will independently review matter.*
